Louisville Public Statement

EPA v US COE
Proposed changes to the
CWA rules (of the Corps of Engineers)
July 19th
Office of the Chief of Engineers
ATTN: CECW-OR
20 Mass. Ave.
Washington, DC 20314-1000
original/2 copies

Clean Water Act, rule definition of fill material and discharge fill material (65 Fed Reg 21292 (April 20, 2000)) and ask that comments be included on the record.

cc: John Lishman
US EPA
1200 Penn Ave NW
WDC 20460

cc: Citizens Coal Council
KRC, P.O. Box 1070 Frankfort, Ky 40602

The proposed rule fails to comply with NEPA. Changing the law to allow dumping coal mining and coal processing waste as fill, will have significant env consequences that must be evaluated by NEPA

JCH Sunday at Office

Additionally, the proposal affects disposal of hardrock non-coal mine waste nationwide and these effects must be studied prior to the rule change. The proposed rule is material, since it makes an arbitrary distinction between coal mining overburden and coal mine processing waste is contrary to the goals of the CWA. Allowing headwater streams to be converted into sites for waste disposal and allowing placement of spoil material for construction of sediment ponds instream is an improper private appropriation of public waters.
