USACE Campaign Plan

- Objective 3.c: Deliver reliable infrastructure using a risk-informed asset management strategy

Asset Management Basic Tenets

- Know what you have
- Know what condition it is in
- Know what it would cost to get it to original condition

Navigation Assets

- Navigation Assets
 - ▶ Locks
 - ▶ Channels
 - ▶ Structure – Jetties, River Training Works
 - ▶ Bridges
- Operational Condition Assessments (OCA) needed for each asset group

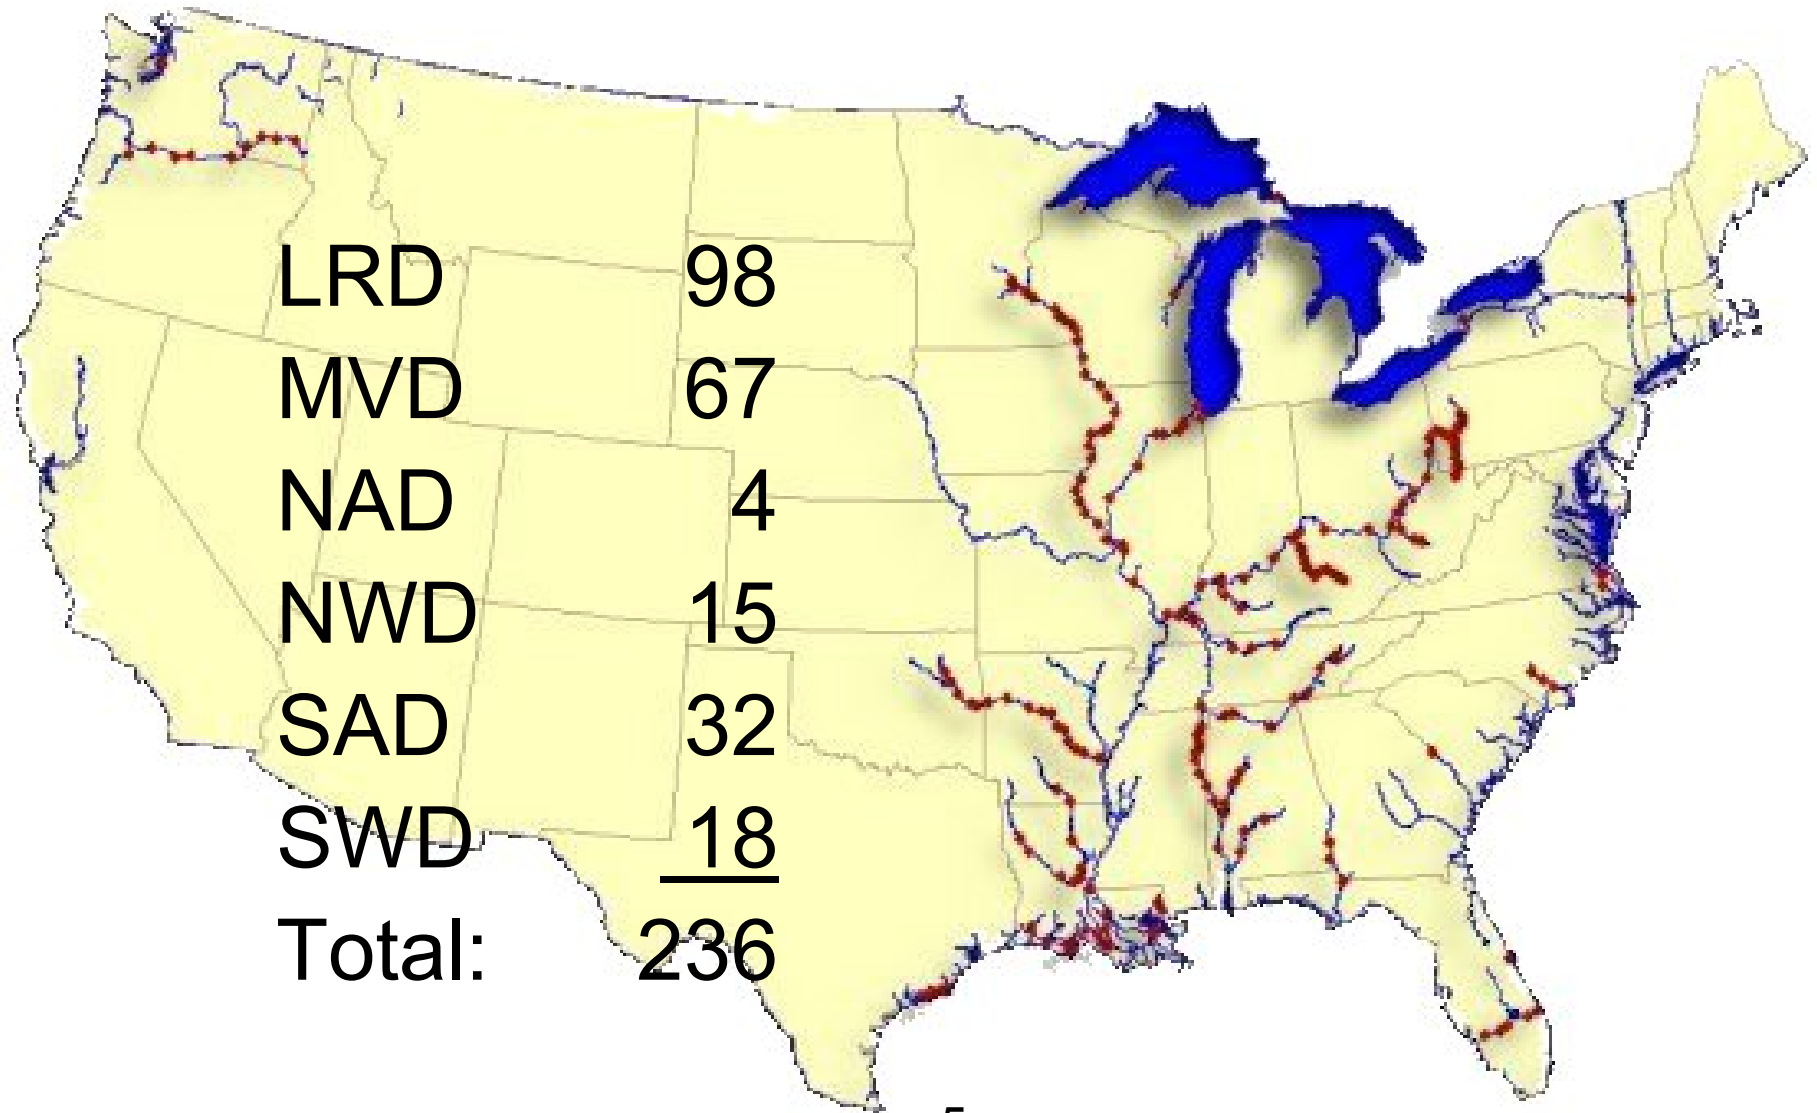

USACE Navigation Locks

	Chambers	Locations
IWTF named systems	207	170
Non-IWTF shallow draft locks	15	15
Deep draft locks	<u>9</u>	<u>7</u>
	Total: 231	192
Operated by State/Local	<u>5</u>	<u>5</u>
	Total: 236	197

IMTS Navigation Locks

NavLock Condition

Dam Safety Assessment Criteria, DSAC

- Evaluates risk of uncontrolled loss of pool
 - ▶ Components associated with water control
 - ▶ Underseepage
- DSAC 1 Active Failure
- Evaluations underway, complete inventory in 2010

Navigation Locks & Dams OCA's

- Focus on conditions that affect ability to pass traffic and maintain pool.
- Assess all navigation locks and dams in the inventory with consistent criteria.
- Over 250 Components per project.
- 1-2 days, \$10K per lock.

NavLock OCA

Upload for QA/QC when Done

Navigation Relative Risk Matrix

**TABLE V-3
Relative Risk Ranking Matrix**

Condition		Condition Classification				
		F (Failed)	D (Inadequate)	C (Probably Inadequate)	B (Probably Adequate)	A (Adequate)
Consequence Category	Consequence					
	I	25	24	22	19	15
	II	23	21	18	14	10
	III	20	17	13	9	6
	IV	16	12	8	5	3
	V	11	7	4	2	1

NavLock OCA Schedule

- Initial assessments funded in FY10
- 1st and 2nd Quarter conduct training
- 3rd and 4th Quarter conduct assessments
- Results available for Operations and Maintenance (O&M) and Construction investment decisions for the FY13 Budget development (Feb 2011)

In the future ...

- After initial baseline evaluation in FY10 future OCA's will be combined with other inspections
- Evaluating revisions to other inspection efforts to directly link to budget prioritization process
- FEM deployment will collect data on components
- Justify resources to enable IMTS to move from 'Fix as Fail' to 'Preventative Maintenance'

IMTS - Reliable, Efficient, Resilient
