4 October 2012

US Army Corps of Engineers
BUILDING STRONG®

Why are we doing this?

- USACE is building EGES solutions to join business lines for a corporate perspective
  - Emergency Management
  - National Levee Database
  - National Inventory of Dams
  - Water Management
  - Regulatory Permitting, etc.

- WRDA 2007 Requirements
  - Section 2017 – USACE will provide access to water resources data and related water quality data to the public and all stakeholders for integrated water resources decision making

Mission

CorpsMap is the USACE nationwide enterprise GIS implementation. As described in EM 1110-1-2909, CorpsMap is the single authoritative source for USACE national geospatial data assets. CorpsMap consists of an operational geospatial database, an open interface, and a web portal. CorpsMap supports data analysis and visualization using a Web Browser, Google Earth, ESRI ArcGIS, C/JMTK, and other off-the-shelf software

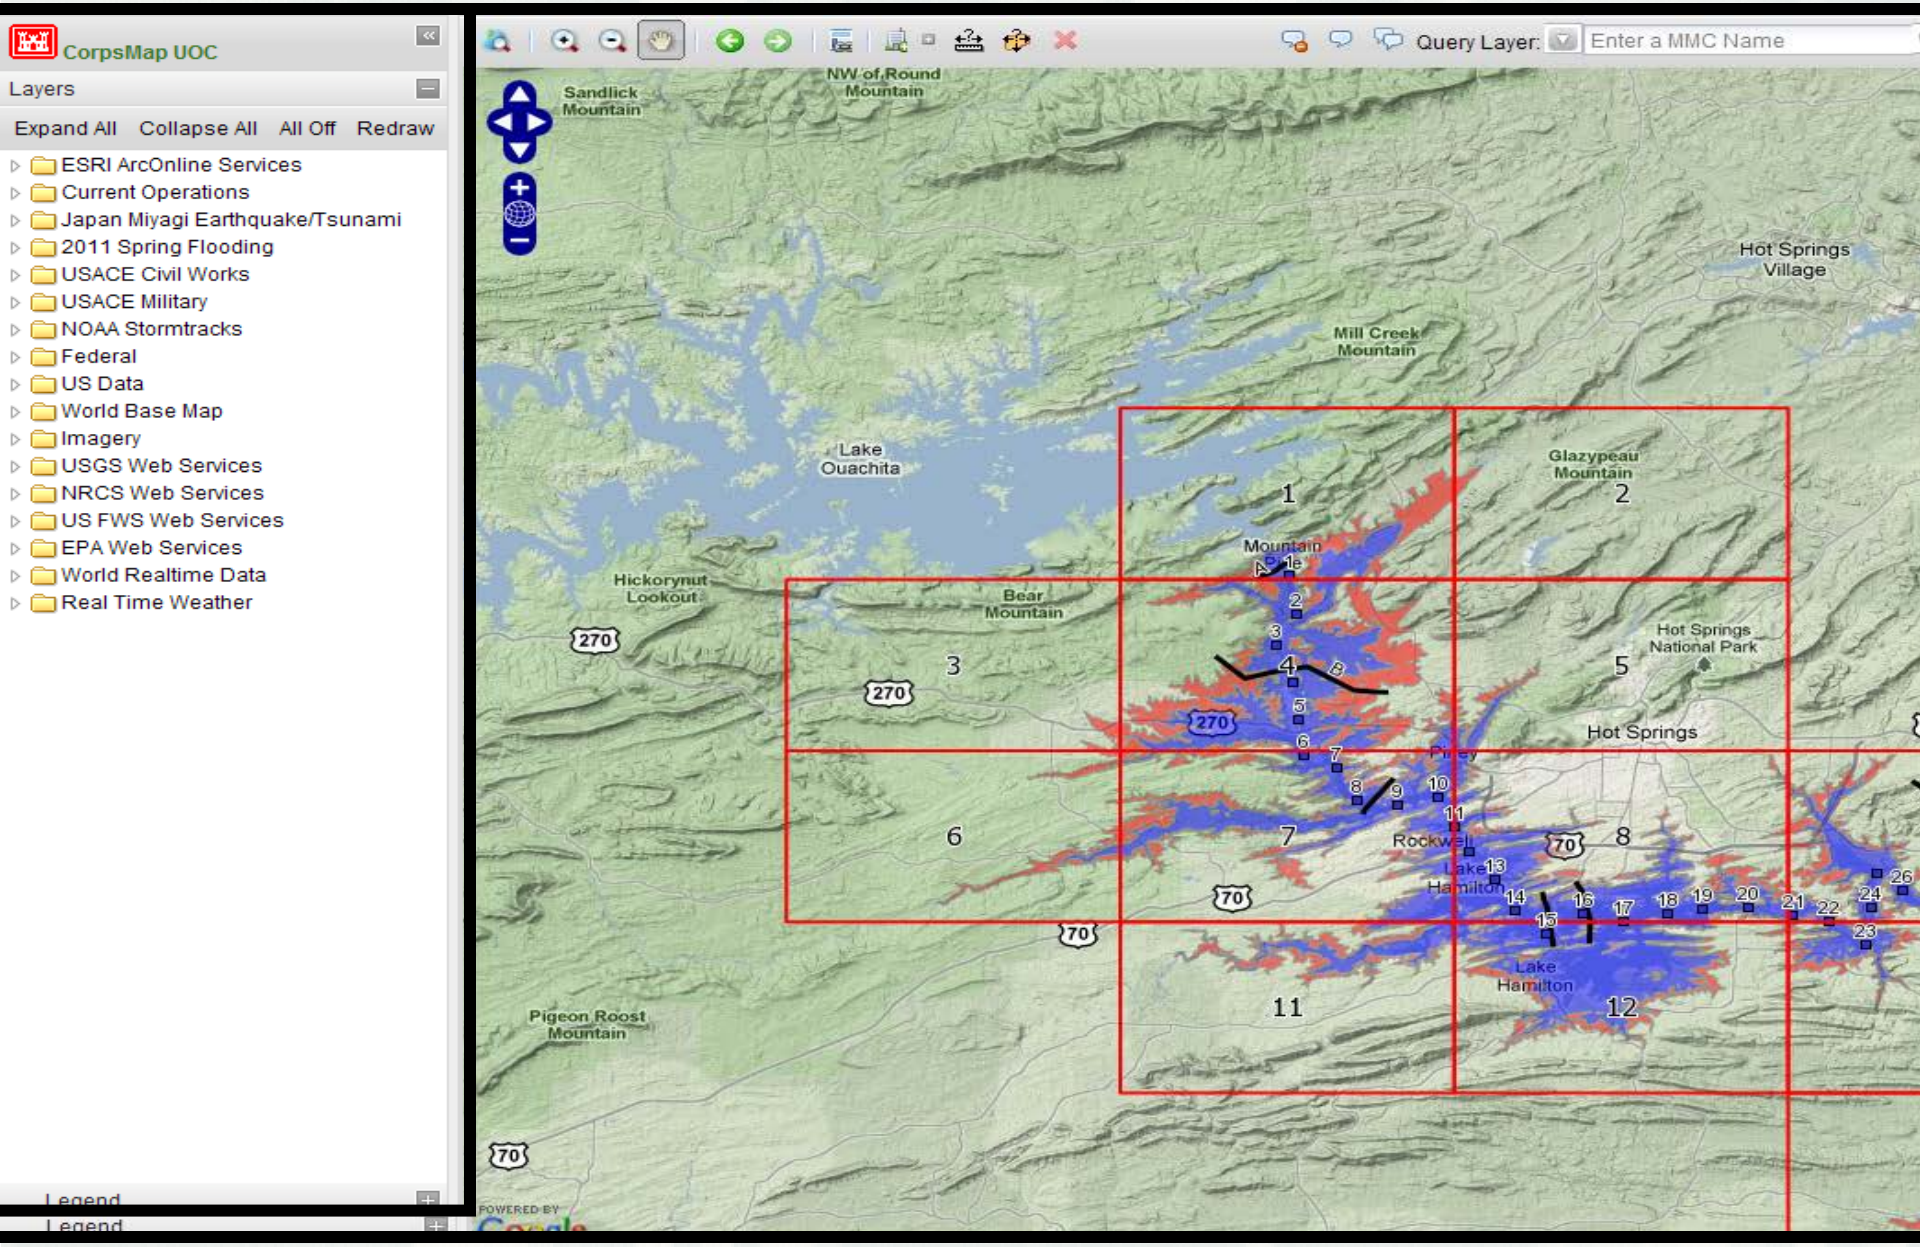
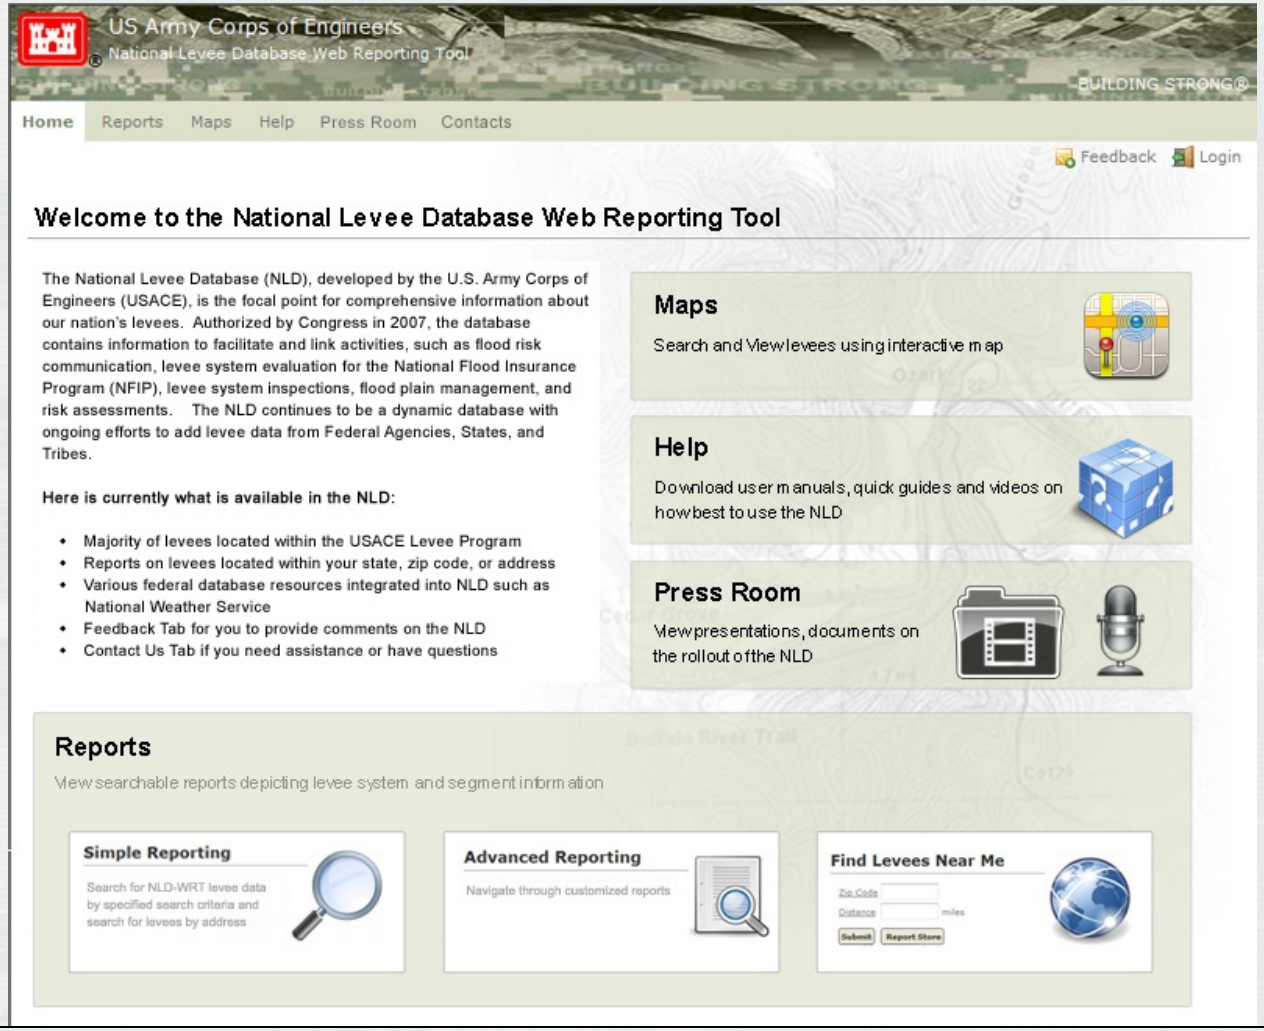
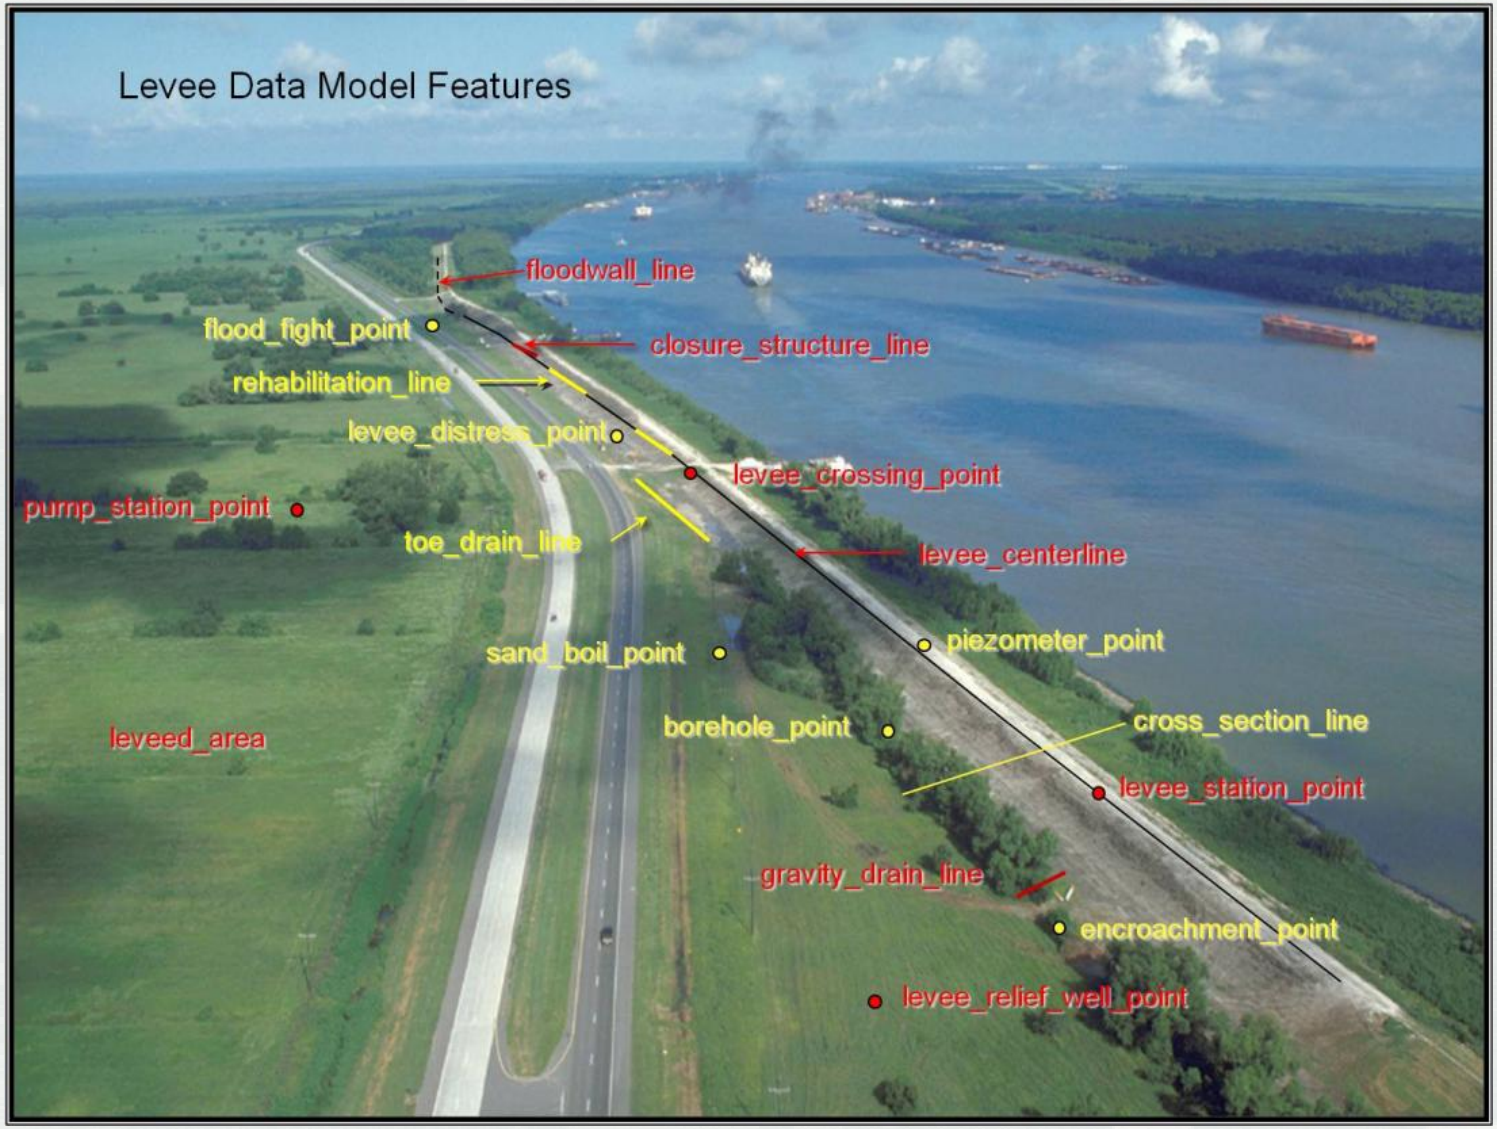
Emergency Operations-CorpsMap USACE EOC



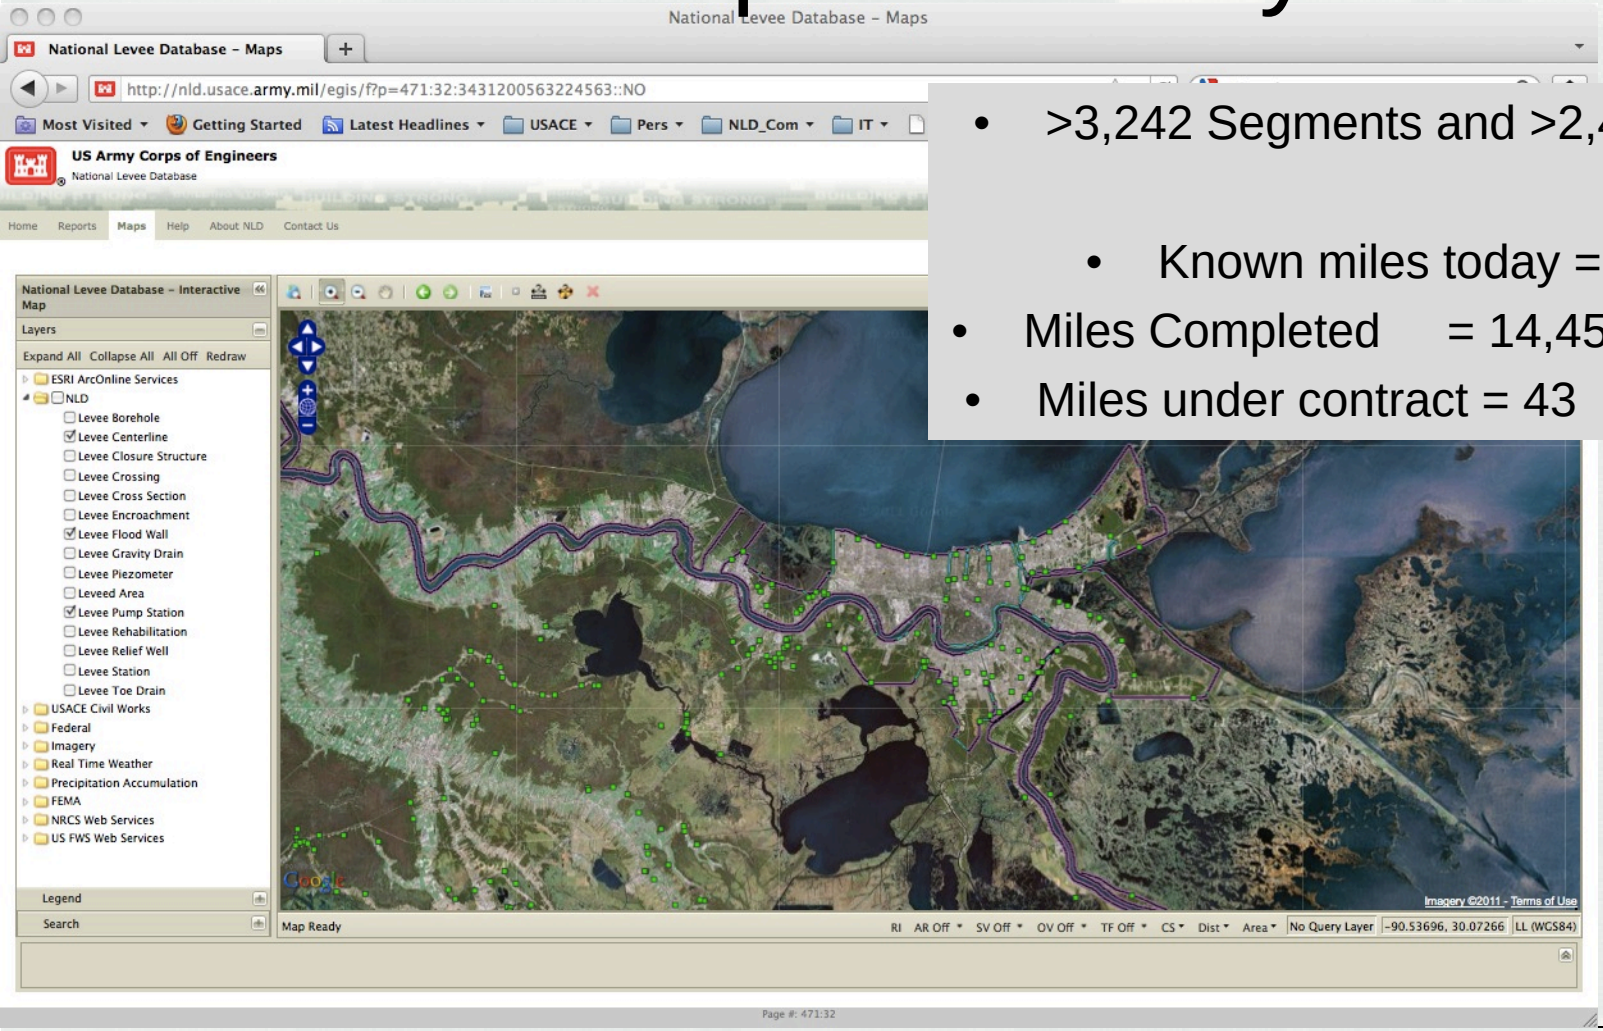
National Levee Database
http://nld.usace.army.mil



NLD Features



National Levee Database
Corps Inventory



- >3,242 Segments and >2,486 Systems
  - Known miles today = 14,501
- Miles Completed = 14,458 > 99.9%
- Miles under contract = 43 < .1%

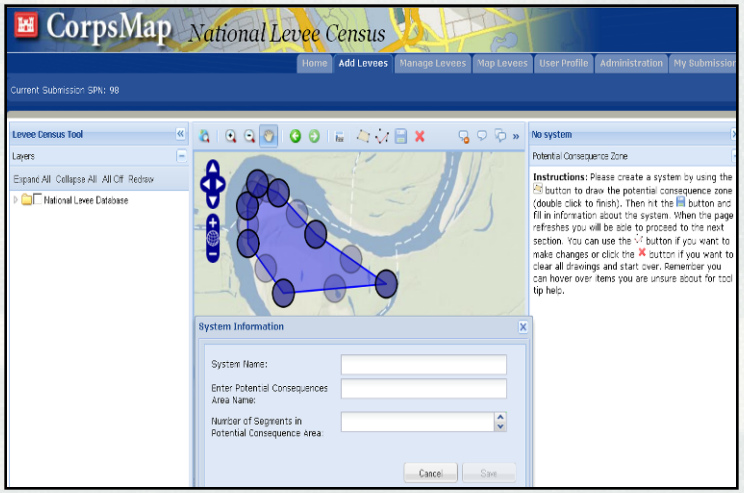
BUILDING STRONG®

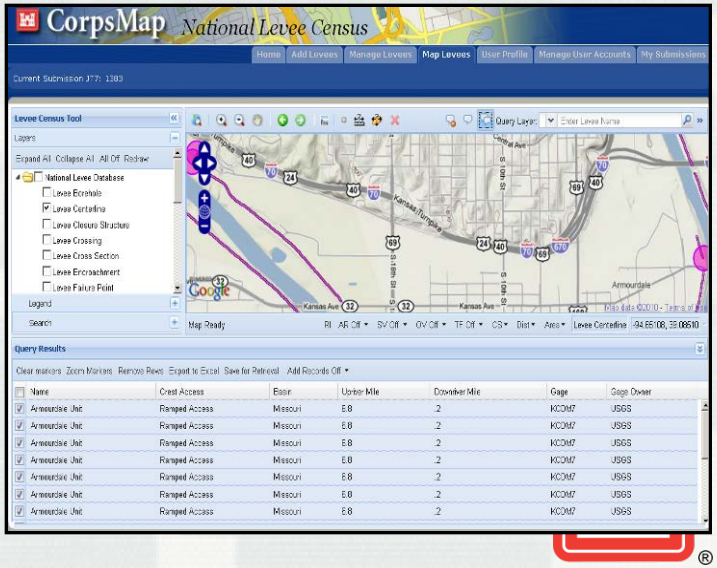
Universe of Levees

- "USACE Program" Levees in the NLD
  - 14,500 miles = 5 times across the US.
- FEMA Mid-Term Levee Inventory (MLI):
  - 35,339 miles = 12 times across the US.
  - Overlaps NLD.
- All Levees in the Country:
  - National Committee on Levee Safety Estimate
  - 100,000 miles = 5 times around the world.

Data Management Tool

Developed as a tool to allow external stakeholders the ability to contribute and manage their levee data to establish a comprehensive levee inventory





- **Target State**
  - ► Real-time data integration with NLD
  - ► Allow users to import levee data from existing data sets (e.g., .shp and PGDB files)
  - ► Provide auditing and change management capability for user submissions
  - ► Standardized review/approval process

Access to Water Resource Data to Support Watershed Management

- Provide public access to water resources and related water quality data in the custody of USACE
  - Include section 404 of the Federal Water Pollution Control Act
  - Appropriately employ geographic information system technology and linkages to water resource models and analytical techniques
