

US Army Corps of Engineers

Institute for Water Resources

BUILDING STRONG®

Corps Chief Economist (2010)

Status: **Project Manager:**

In Progress [David Moser](#)

Purpose: The Corps of Engineers serves as chief policy and technical advisor and consultant for economic analysis of water resources projects for the entire Corps of Engineers. In that role, he serves as chief economic expert for the Civil Works program.

Objective: The Chief Economist organizes and provides leadership to the Corps economics Community of Practice. Additionally, he provides authoritative direct consultation and advice to HQUSACE staff and MSCs for difficult evaluation issues.

Benefits: The Chief Economist helps assure high quality and defensible economic analysis of Civil Works projects. Additionally, he helps assure that the economic analysis is consistent with economic theory and data. Finally, the Chief Economist is the Civil Works champion of the economics Community of Practice.

Progress: Fall senior economist meeting held in Charleston, SC 14-15 Oct with 19 attendees. Meeting report in preparation
