Cumulative Effects Guidance for CW Projects (2010)

Status: **Project Manager:**

In Progress [Jeannette Baker](#)

Purpose: Develop guidance for cumulative effects assessments for civil work projects. Also develop training class for using guidance.

Objective: Develop guidance and training for cumulative effects assessments. Outcomes including improving cumulative effects assessments across CW projects.

Benefits: Guidance will clarify how and when to conduct cumulative effects assessments for civil works projects.

Progress: We have held an organizational meeting and have the workshop scheduled for October. Project is on schedule and should meet its completion date.
