## Guidance Update: ETL 1110-2-325 Ice Stage Frequency (2010)

**Status:**            **Project Manager:**

In Progress        [Kathleen White](#)

---

**Purpose:**            The purpose of this project is to update the ETL 1110-2-325, Ice-Influenced Flood Stage Frequency Analysis, and its supporting information

---

**Objective:**        The objective is to develop updated guidance to reflect the best available science and engineering in the face of changing climate.

---

**Benefits:**         Updating the ETL will allow planners and engineers to use the best available information on ice-jam-induced flooding.
