Guidance Update: Sea-Level Change (2010)

Status: **Project Manager:**

In Progress [Kathleen White](#)

Purpose: The purpose of this project is to develop an Engineering Technical Letter containing updated guidance on addressing the impacts of sea-level change on USACE projects.

Objective: The objective of the project is to update and improve guidance for addressing sea-level change impacts on USACE projects now and in the future.

Benefits: The benefit of this project is that USACE projects will be more resilient and capable of withstanding sea-level change impacts.
