BUILDING STRONG®

Management Measures Digital Library (2010)

Status: **Project Manager:**

In Progress [Joy Muncy](#)

Purpose: The Management Measures Digital Library (MMDL) site is designed to identify and describe examples of selected management measures, engineering features or alternatives and their components.

Objective: To provide sufficient information to stimulate plan formulation and assist planners in identifying what is out there and to "visualize" how a management measure or engineering feature may be applicable to their project.

Benefits: MMDL will allow Corps engineers, planners and other team members to easily obtain information in selecting management measures or alternatives and their engineering features. This will save time and resources as most of the information will be gathered in one place. Each MM is shown as a sketch and/or photograph.

Progress: Ecosystem Restoration MMDL is on the IWR website. Dams, levees and floodwalls is on-going and should be on-line early summer FY08.

Products:

- [Management Measures Digital Library - Eco Restoration \(web site\)](#)
- [Management Measures Digital Library - Floodwalls, Levees, and Dams](#)
