## National Economic Development Manuals (2010)

**Status:**            **Project Manager:**

In Progress        [Erin Rooks](#)

---

**Purpose:**            The main purpose of this project is to update and maintain the National Economic Development Manuals, specifically to update and create web-based versions for three National Economic Development Manuals: Deep Draft Navigation, Coastal Storm Risk Management, and Flood Risk Management.

---

**Objective:**        To publish the Deep Draft Navigation and Coastal Storm Risk Management Manual in FY10 and to publish the updates to the Flood Risk Management Manual in FY10.

---

**Benefits:**         Economists can learn how to do various types of economic analysis and the manuals are now more easily accessible via the web and easier to update in the future.

---

**Progress:**        The Deep Draft Navigation manual will be the first to be completed. It requires one final review and editing, and then it will be sent to the editorial board for publishing.
