

US Army Corps of Engineers

Institute for Water Resources

BUILDING STRONG®

Natural Resources Team Support (NRTS) (2011)

Status: Completed

Purpose: The purpose of this project is to provide technical and management support to Corps Natural Resources Management activities.

Objective: Provides miscellaneous technical support to Corps Natural Resources Management activities, including staff resources, outside services, onsite training, and equipment. Also to hold two onsite training sessions for the Recreation and Environment-Stewardship business lines' Coach, Assist and Train Teams (CATT) that provide direct support to projects, districts, and field users of Rec-BEST and E-S BEST for budget development purpose.

Benefits: To bridge the gap between the research and the natural resources management arms within the Corps.

Progress: Planned and coordinated with HQ and ERDC for the out year activities. This is an ongoing project that has multiyear objectives and deliverables.
