PRA Dam Safety (2011)

Status: Completed

Purpose: The PRA Dam Safety Project, also known as the Operations and Maintenance Remaining Items (OMRI) is the funding mechanism for up to 100 separate sub-projects (or initiatives) related to developing and implementing the RMC's dam safety program.

Objective: Fund key initiatives for implementation of the RMC's dam safety program including funding Periodic Assessment Teams, development of toolboxes and work products for risk analysis, funding reviews and support contracts with A/E firms, development of software, etc.

Benefits: The PRA Dam Safety Project, also known as the Operations and Maintenance Remaining Items (OMRI) is the funding mechanism for up to 100 separate sub-projects (or initiatives) related to developing and implementing the RMC's dam safety program.

Progress: Many of the planned 2011 initiatives are well underway, and making good progress toward completion. More details will be provided at end of Q3
