BUILDING STRONG®

## Performance Based Budget Support Program - AFC (2010)

**Status:**            **Project Manager:**

In Progress        [David Moser](#)

---

**Purpose:**            This initiative would extend the current regional economic models used in the CE Recreation Business Line to apply across all USACE CW Business lines.

---

**Objective:**        To provide accurate and defensible estimates of local job creation and other economic measures such as income and sales. It will also aid in documenting and managing the performance of the ARRA spending and other CW program activities.

---

**Benefits:**            Accurate and defensible estimates of economic impacts can be utilized to track progress of ARRA and to justify continued operation, maintenance and construction work performed by the Corps, and identify necessary improvements to the projects to better meet the goal of ARRA.

---

**Progress:**            contract modification was signed and awarded on December 11. Developed Annotated Agenda for the second workshop to be held with non Corps Regional Economists after the Corps user workshop. Confirmation of attendees for Regional Economist Workshop. Initiated development of approach for evaluating impacts of non-federal spending associated with USACE business lines according to the MOD.
