BUILDING STRONG®

## Streamlining of Post-Authorization Change Activities (2010)

**Status:**            **Project Manager:**

In Progress        [Shawn Komlos](#)

---

**Purpose:**            The purpose of this project is to review and, as justified, make recommendations for modifying Post-Authorization Change (PAC) policies and practices to accommodate changes that might be prompted by periodic reassessments of authorized project impacts, scopes and budgets in the context of changing external factors/conditions.

---

**Objective:**        The project objectives are to document existing post-authorization change procedures and typical activity timelines; identify opportunities to further streamline existing practices; identify activities to further optimize post-authorization change practices; and develop draft recommendations for HQUSACE/OASA's consideration.

---

**Benefits:**         Activities associated with this project will help expedite the delivery of robust and resilient watershed need-based solutions to the Nation's changing water resource challenges.
