Institute for Water Resources

BUILDING STRONG®

Update of Digest of Water Resources Policies and Authorities (Policy Digest), EP1165-2-1, 30 July 1999 (2010)

Status: **Project Manager:**

In Progress [Kevin Knight](#)

Purpose: ER 1165-2-1 has not been updated since 30 July 1999, and significant changes in legislation and policy necessitate that this compendium of USACE policy be made current. This project will therefore update the Policy Digest and convert it to a web-based document.

Objective: The project objective is to update this reference on USACE policy and convert it to a web-accessible document.

Benefits: The updated version of the Policy Digest will assist field operations by providing current and accurate guidance on Corps policy. Once it has been converted to a web-based document, further updates should be more easily achieved.

Progress: Draft report submitted to HQ for review April 2009. Draft digest has been under review at HQ. No comments have been received as of this date.
